

Brian Stemme is project director for BioCrossroads. He has a strong background in life sciences market development and research. He is responsible for identifying and developing opportunities for growth within Indiana's life sciences sector, evaluating early-stage companies for investment by BioCrossroads' seed funds and supporting the State's efforts to attract and grow life sciences companies.

Brian led the formation of the Central Indiana Corporate Partnership's AgriNovus Indiana, a nonprofit established in 2013 to leverage Indiana's strengths in agricultural innovation, working with industry CEOs, Indiana's Lieutenant Governor and Purdue University to launch the new entity, publish a first-of-its-kind report and support early-stage ag-tech companies.

He is a member of the board of directors of Allinaire Therapeutics and Scioto Biosciences.
